

Docker Essential Commands

Cheat Sheet

Beginner → Intermediate Docker Commands

1. Check Docker Version & Info

```
docker --version
docker info
```

2. Pull Images

```
docker pull <image>
```

3. List Images & Containers

```
docker images
docker ps
docker ps -a
```

4. Run a Container

```
docker run <image>
docker run -it <image> bash
docker run -d <image>
docker run -p 3000:3000 <image>
docker run --name myapp <image>
```

5. Stop/Start Containers

```
docker stop <id>
docker start <id>
```

6. Remove Containers & Images

```
docker rm <id>
docker rmi <image>
docker rm -f <id>
```

7. Logs

```
docker logs -f <container>
```

8. Exec Into Container

```
docker exec -it <container> bash
```

Intermediate Commands

9. Build Image

```
docker build -t myapp .
```

10. Tag Image

```
docker tag myapp repo/myapp:v1
```

11. Docker Compose

```
docker compose up -d
docker compose down
docker compose up --build
```

12. Stats

```
docker stats
```

13. Inspect

```
docker inspect <id>
```

14. Copy Files

```
docker cp file.txt container:/app
```

15. Prune

```
docker system prune -a --volumes
```

Advanced Commands

16. Top

```
docker top <container>
```

17. Pause

```
docker pause <container>
```

18. Export/Import

```
docker export <container> > app.tar
```

19. Save/Load Image

```
docker save myapp > myapp.tar
```

20. Network

```
docker network create mynet
```

21. Disk Usage

```
docker system df
```

22. Update Env

```
docker update --env KEY=VALUE <container>
```

23. Remove All (Danger)

```
docker rm -f $(docker ps -aq)
docker rmi -f $(docker images -q)
```
